PROFESSIONAL EXPERIENCE

Full Stack Engineer — AI & Automation (Contract • Fully Remote) | HOODS HUB — India Nov 2024 – Jan 2026
14 months fully remote, async collaboration across India, USA, and Pakistan time zones. Owned features end-to-end with zero micromanagement.

- **Async delivery:** managed 24+ production projects independently across time zones — requirements, architecture, development, QA, and deployment, all self-directed.
- **Full stack:** built Next.js frontends with TypeScript and FastAPI/Python backends — PostgreSQL and MongoDB databases, optimised schemas reduced latency 78% (800ms → 180ms).
- **AI integration:** shipped production LLM services using OpenAI GPT-4o, Anthropic Claude, and LangChain — RAG pipelines, multi-agent systems, and n8n automation workflows.
- **Real-time features:** implemented WebSocket-based live features and event-driven updates across multiple SaaS products.
- **DevOps:** Docker, GitHub Actions, Azure CI/CD on every project — cut release time from 2 hours to 8 minutes. Zero production incidents across all deployments.

MERN Stack Developer (Full-Time) | TechNetCloud — Karachi, Pakistan Aug 2023 – Sep 2024
Full-time backend API development and database architecture.

- **REST APIs:** built Node.js/Express APIs with PostgreSQL and MongoDB — query indexing cut execution time ~35%.
- **Production systems:** maintained Node.js services on Linux with PM2 under high-traffic conditions.

Frontend Developer (Part-Time • Remote) | EscapeWire Solutions — USA Feb 2022 – May 2023
Part-time remote role with a US-based startup — async, independent delivery.

- Delivered 6+ React.js UIs with TypeScript from Figma designs; integrated 8 REST APIs; improved FCP 30%.

KEY PROJECTS

AI Legal Assistant Platform — Next.js • FastAPI • Python • LangChain • ChromaDB • OpenAI GPT-4o • Docker • github.com/Arbab-Mustafa

- **Problem:** legal teams spent hours searching 500+ page documents. Built full RAG pipeline with FastAPI backend and Next.js frontend — cited answers in <3s, 70% time saved.

AI Resume Builder SaaS — Next.js • FastAPI • Python • LangChain • MongoDB • WebSockets • Docker • github.com/Arbab-Mustafa

- **Problem:** resume writing is slow and ATS-inconsistent. Built SaaS with LangChain + GPT-4o content engine, real-time WebSocket preview, Dockerised CI/CD deployment.

Real Estate Transaction Platform — Next.js • FastAPI • PostgreSQL • Stripe • PayPal • OAuth 2.0 • Docker • github.com/Arbab-Mustafa

- **Problem:** no secure backend for agreements and payments. Built Next.js + FastAPI platform with OAuth 2.0 auth and dual payment gateway — disputes reduced to zero.

REMOTE WORK PROFILE

Timezone: UTC+5 (Pakistan) • EST overlap 9 AM–5 PM • GMT/CET full overlap 2 PM–10 PM

Communication: Slack • Jira • GitHub • Notion • async-first • responsive within business hours of EST/GMT

Work style: 14+ months of fully remote contract delivery • self-managed • zero revision disputes across 24 projects

Setup: Dedicated workspace • stable internet • available for video calls during agreed overlap hours

TECHNICAL SKILLS

Frontend: Next.js (App Router) • React.js • TypeScript • Tailwind CSS • Redux Toolkit • WebSockets

Backend: Python • FastAPI • Node.js • Express.js • REST APIs • WebSockets • Microservices

AI & LLM: OpenAI API • Anthropic Claude • LangChain • LangGraph • RAG Pipelines • Prompt Engineering

Databases: PostgreSQL • MongoDB • MySQL • Redis • ChromaDB • Pinecone • Query Optimisation

DevOps & Cloud: Docker • Docker Compose • Azure • GitHub Actions • CI/CD • Linux • Nginx

Auth & Tools: JWT • OAuth 2.0 • RBAC • Stripe • PayPal • Git • Postman • Jira • Agile/Scrum

EDUCATION & CERTIFICATIONS

Bachelor of Software Engineering (BSE) • UET Taxila, Pakistan Sep 2022 – Jun 2026 (Expected)

Certifications: IBM Full Stack Software Developer • AI Applications with Python (IBM) • Django + SQL (IBM) • Python for Data Science (IBM) • Project Management (Microsoft/LinkedIn)
