SUMMARY

Full-stack engineer who has worked remotely for international clients since 2024. At HOODS HUB I spent 15 months on contract delivering 17+ web apps, each owned from requirements to deployment, mostly on my own and across time zones. Strongest with Next.js / TypeScript and FastAPI, with LLM features (RAG document search) added where a product needed them.

REMOTE WORK

Time zone: UTC+5 (Pakistan). Available 2 PM – 10 PM PKT, which covers GMT / CET business hours; US East mornings (about 9 AM – 12 PM EST) overlap too.
How I work: Written updates first, calls when needed. Slack, Jira, GitHub, Notion. I scope work in tickets and tell the client early when something slips.

EXPERIENCE

Full Stack Engineer (Contract), HOODS HUB Nov 2024 – Jan 2026
Software company · Contract · Fully remote, clients across several time zones

- Owned 17+ client projects from requirements through architecture, development, testing and deployment, working independently.
- Built Next.js / TypeScript frontends on FastAPI and Node.js backends with PostgreSQL and MongoDB.
- Cut API response time by at least 65% by redesigning database schemas and rewriting slow queries.
- Cut releases from 2 hours to 8 minutes with Docker and GitHub Actions / Azure pipelines.
- Built LLM features with GPT-4o, Claude and LangChain, including RAG document search with cited answers.
- Built WebSocket real-time features and Stripe / PayPal and OAuth 2.0 flows across several products.

Full Stack Developer Intern, AIREC Jul 2026 – Oct 2026
AI health-tech company · Rawalpindi / Islamabad · On-site

- Built React / Next.js features and Node.js / Python services for an AI health-tech product; worked in Agile sprints with code review.

Full Stack Web Developer, TechNetCloud Aug 2023 – Sep 2024
Karachi, Pakistan

- Built Node.js / Express REST APIs on PostgreSQL and MongoDB; indexing cut query time by about 35%. Kept services stable on Linux with PM2.

Frontend Developer, EscapeWire Solutions Feb 2022 – May 2023
US startup · Part-time · Remote

- Built 6+ React / TypeScript interfaces from Figma designs with a US team, working asynchronously. Integrated 8+ REST APIs; First Contentful Paint improved 30%.

PROJECTS

AI Legal Assistant Platform — Next.js, FastAPI, LangChain, ChromaDB, GPT-4o, Docker

- RAG search over 500+ page legal documents: cited answers in under 3 seconds, about 70% less search time (estimated).

AI Resume Builder SaaS — Next.js, FastAPI, LangChain, GPT-4o, MongoDB, WebSockets, Docker

- Content engine with GPT-4o, a live WebSocket preview, and a Dockerised CI/CD deployment.

Real Estate Transaction Platform — Next.js, FastAPI, PostgreSQL, Stripe, PayPal, OAuth 2.0, Docker

- Agreements and payments with two gateways; transaction disputes dropped to zero.

SKILLS

Frontend: Next.js, React, TypeScript, Tailwind CSS, Redux Toolkit
Backend: Python (FastAPI), Node.js / Express, REST APIs, WebSockets, JWT / OAuth 2.0, RBAC
AI: OpenAI GPT-4o, Claude, LangChain, RAG, ChromaDB
Data and DevOps: PostgreSQL, MongoDB, MySQL; Docker, GitHub Actions, Azure, Linux, Git

EDUCATION

Bachelor of Software Engineering (BSE), UET Taxila, Pakistan — Sep 2022 – Jun 2026
Certifications: IBM Full Stack Software Developer; AI Applications with Python (IBM); Django + SQL (IBM); Python for Data Science (IBM); Project Management (Microsoft / LinkedIn)
