ABOUT MYSELF

Full Stack Software Engineer with 3+ years of hands-on experience specializing in building scalable, high-performance web applications using the MERN Stack (React, Next.js, Node.js, MongoDB) and Python (FastAPI).

Expert in developing modern, responsive front-ends and robust back-end systems with practical expertise in AI integrations and cloud deployment. Proven ability to take full ownership of projects from requirements to production, consistently delivering clean, secure, and impactful solutions that drive business efficiency and user satisfaction.

SKILLS

Programming Languages: Python, JavaScript, TypeScript

Frontend: React.js, Next.js (App Router), TypeScript, Tailwind CSS, Responsive & Accessible Design

Backend: Python (FastAPI), Node.js, Express.js, RESTful APIs, Microservices

Databases: MongoDB, PostgreSQL, SQL Optimization, Data Modeling

Cloud & DevOps: AWS(basic), Azure, Docker, CI/CD Pipelines

Other : Agile/Scrum, Clean Architecture, Git, Performance Optimization

Professional Experience

Full Stack Software Engineer | HOODS HUB | IND Remote

Nov 2024– Jan 2026

- Designed, developed, and successfully deployed production-grade web applications using MERN Stack and Python (FastAPI), resulting in improved scalability, performance, and user satisfaction.
- Built and integrated AI-powered features including LLM APIs and RAG pipelines that automated business workflows and enhanced operational efficiency.
- Managed end-to-end cloud deployments on Azure and AWS using Docker and CI/CD pipelines, ensuring reliability, security, and cost optimization.
- Collaborated with stakeholders to analyze business requirements and deliver maintainable technical solutions following clean architecture principles.

MERN Developer | TechNetCloud | Karachi, Pak

Aug 2023 – Sep 2024

- Contributed to backend development, REST API design, and system integration for scalable business applications.
- Optimized database queries and enhanced application performance for high-traffic environments.

Frontend Developer – EscapeWire Solutions | USA Remote

Feb 2022 – May 2023

- Built and maintained scalable frontend interfaces for a startup platform using React.js and modern frontend technologies.
- Converted business and design requirements into responsive, production-ready user interfaces.
- Integrated APIs and implemented performance optimizations to improve user experience and application responsiveness.

EDUCATION

BACHELORS OF SOFTWARE ENGINEERING

UET Taxila , Pak

Sep 2022 - June 2026

PROJECTS

Beauty Salon Management & Booking System

Situation: The client relied on manual processes for booking, staff management, and payments, leading to operational inefficiencies and errors.

Action: Designed admin dashboard, employee workflows, and service trackingIntegrated payment systems and automated operations Structured APIs for real-time business data flow, Improved operational efficiency and service tracking Enabled full digital control of business processes

Tech: React.js, Node.js, Express.js, MongoDB, REST APIs, Payment Integration

Real Estate Business Platform with Payments & Integrations

Situation: The client required a secure and transparent platform for buyer-seller agreements and transactions.

Action:Developed system with verification workflows and structured data handling. Integrated backend logic for agreement validation. Increased trust and transparency in transactions. Reduced manual errors in agreement handling

Tech: MERN Stack, REST APIs, Payment Gateways, Python (fast api)

AI Legal Assistant Platform

Situation: Legal professionals spent excessive time manually searching through documents and responding to client queries.

Action: Developed an intelligent AI system using React and FastAPI with RAG pipeline to process uploaded documents and deliver accurate, context-aware responses.

Tech: AI APIs, Backend Integration, Data Processing

AI Resume Builder SaaS

Situation: Job seekers faced significant challenges in creating optimized, ATS-friendly resumes efficiently.

Action: Designed and developed a full-stack intelligent platform using Next.js and FastAPI, integrated with LLM for automated content generation, formatting, and PDF export.

Tech: React.js, Node.js, MongoDB, Ollama, Mistral 7b (for local development/testing).
